## Experience the technology global printer manufacturers trust

Features & benefits

- **The SILEX H-260U is a high performance internal print server** uniquely designed to connect two printers on the network; HP printer with EIO Slots and any other USB printer. It is dual printer support for the price and convenience of one print server.

- **The H-260U, a multi-protocol 10/100 TX print server**, is fully compatible with today´s network environment. It is ideal for today´s businesses from SOHO to large office settings.

- **The H-260U is ThinPrint compatible.** Print data is decopressed directly in or at the network printer, which improves bandwidthperfomance of WAN and LAN systems through the printing process. The muchneeded bandwidth is available for other essential applications in server-basedcomputing environments such as Windows Terminal Services.

- **It is also compatible** with the HP (Web) JetAdmin utility for device control and management.

- **The H-260U features leading-edge network capabilities** such as access control using IP Filtering, a high level security feature that prevents unauthorized access to network printers.
